

Using the Sphereon Wallet

Using the Sphereon Wallet

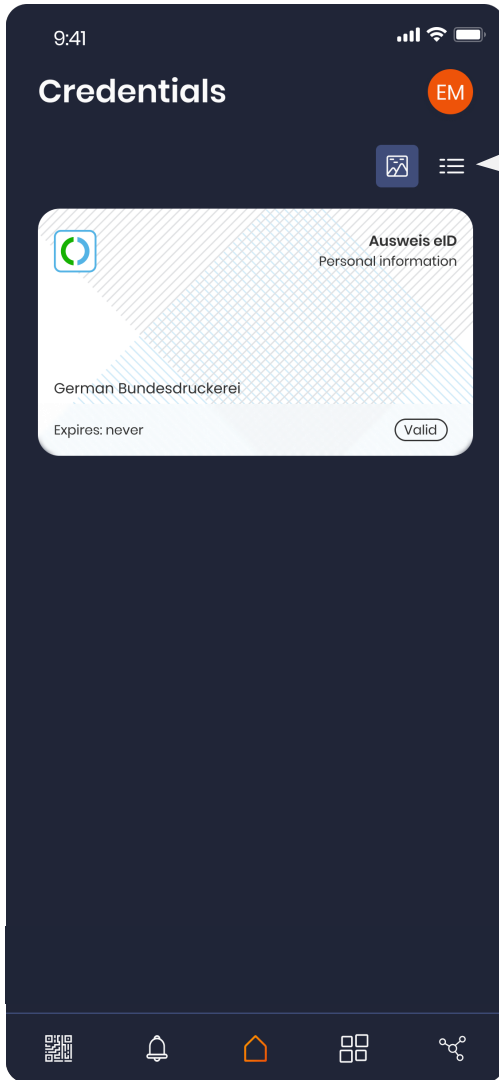

Using the Wallet

This is the “Home” of Wallet.

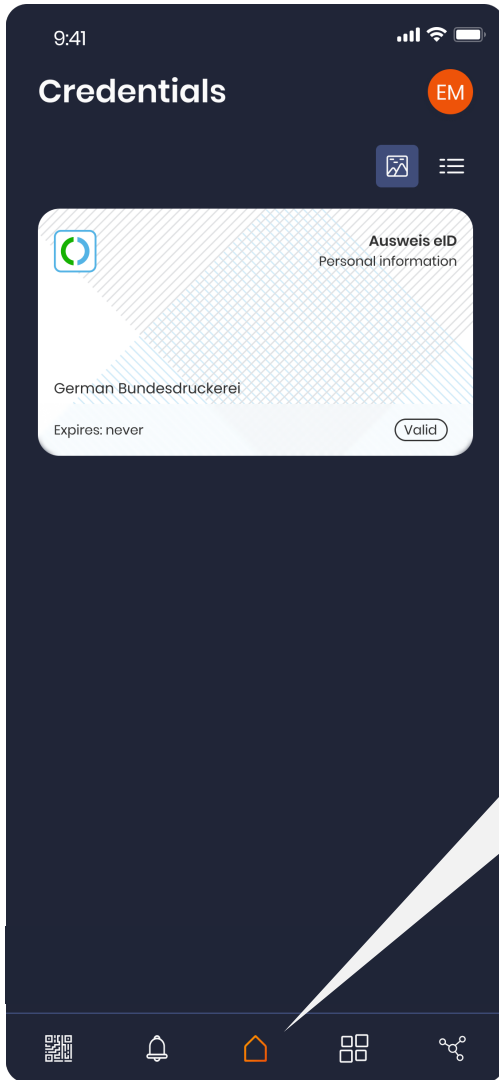

You can choose for a Card view.

Using the Wallet

Or you can use for a List view.

Using the Wallet

On the bottom you see a menu bar.

Using the Wallet

This is for the Home view.

Using the Wallet

This is for the QR-code scanning.

It enables you to scan a QR-code presented by an organization that wants to provide you with a credential.

Using the Wallet

This is for the QR-code scanning.

It enables you to scan a QR-code presented by an organization that wants you to share information with them.

Using the Wallet

This is for the Notifications view.

If there are messages for you from one of your Contacts, you will find them here.

Using the Wallet

This is for the Catalog view.

The Catalog view will show you all the credential cards that are available for you to collect in your wallet.

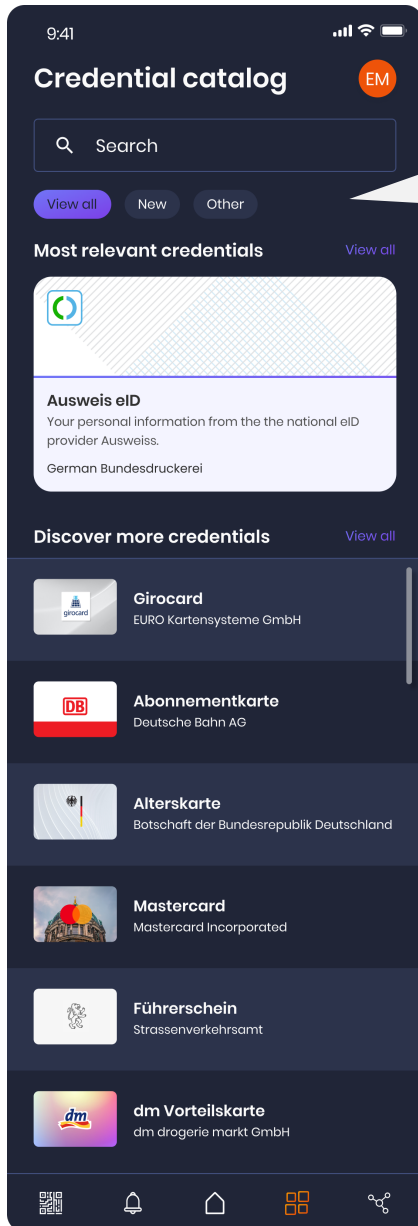

Using the Wallet

This is for the Contacts view.

Any organization that you have agreed to have a connection with, can be found here.

Using the Wallet

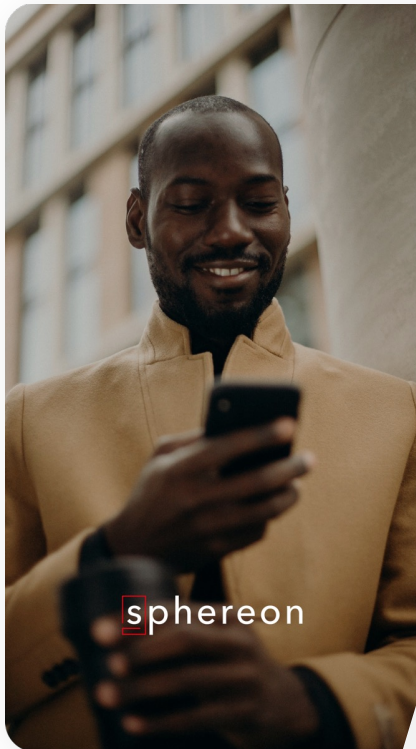

This is an overview of the available credentials in your Wallet and possible other credentials you can request.

This will be explained further in the Wallet User document.

Sharing Information

Sharing information

Sharing information is always done
by request.

Sharing information

**We would like to receive 1 or more credentials
from you**

Purpose: [purpose string vanuit PD here]

allet address

Go

Scan this QR code with your mobile wallet's QR code scanner.
You can also enter your web wallet address to open it.

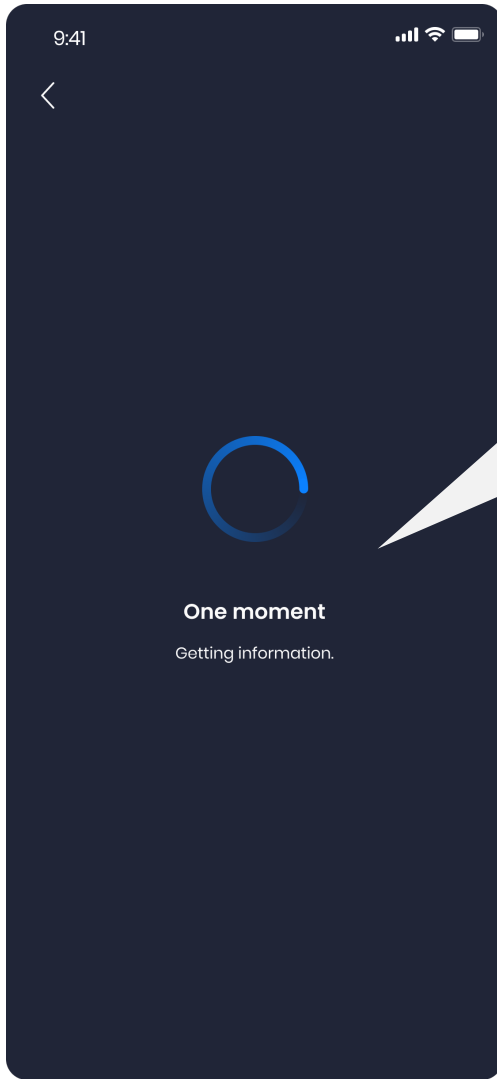

This organization is requesting you
to share some information by
presenting a QR-code.

Information request

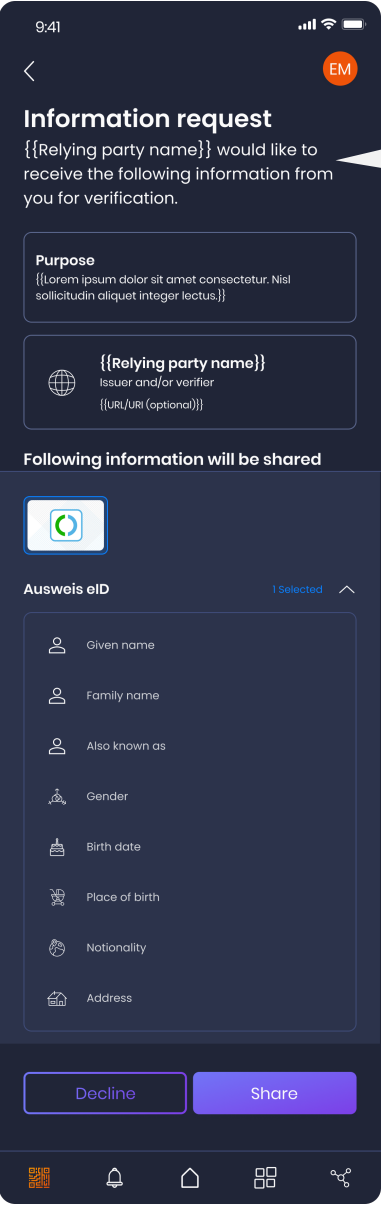

Use the QR-icon to activate the scanning function.

Information request

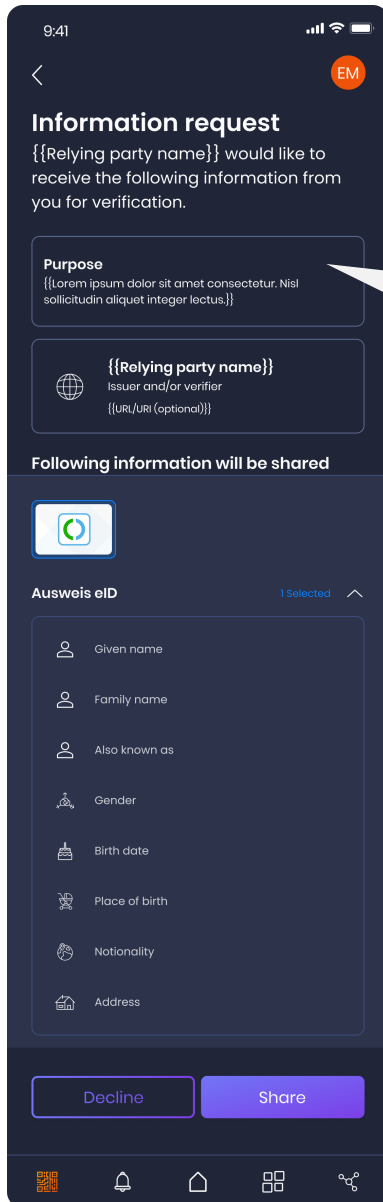

The requested information is being retrieved.

Information request

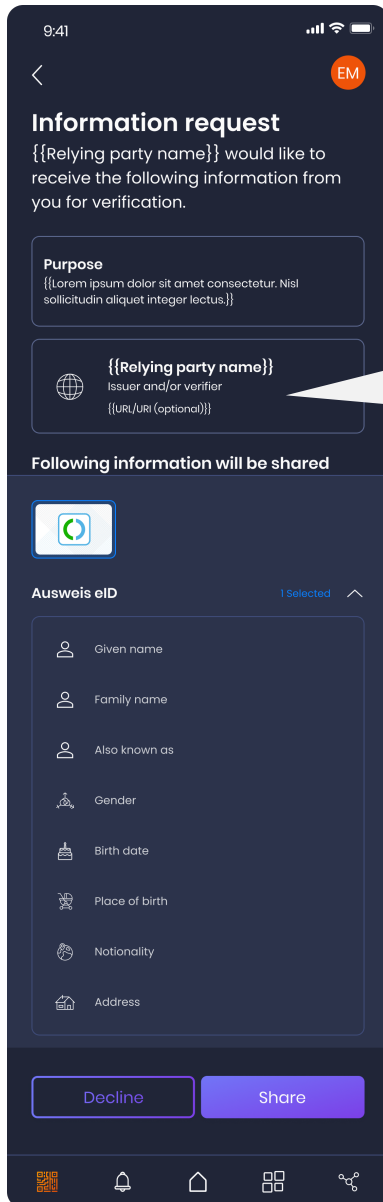

Your Wallet tells you what the organization is asking.

Information request

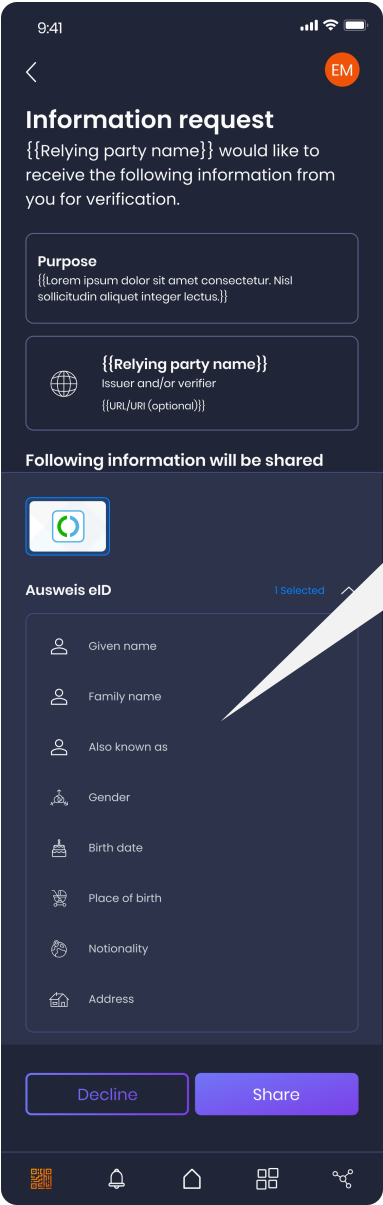

The organization must tell you the purpose of the request.

Information request

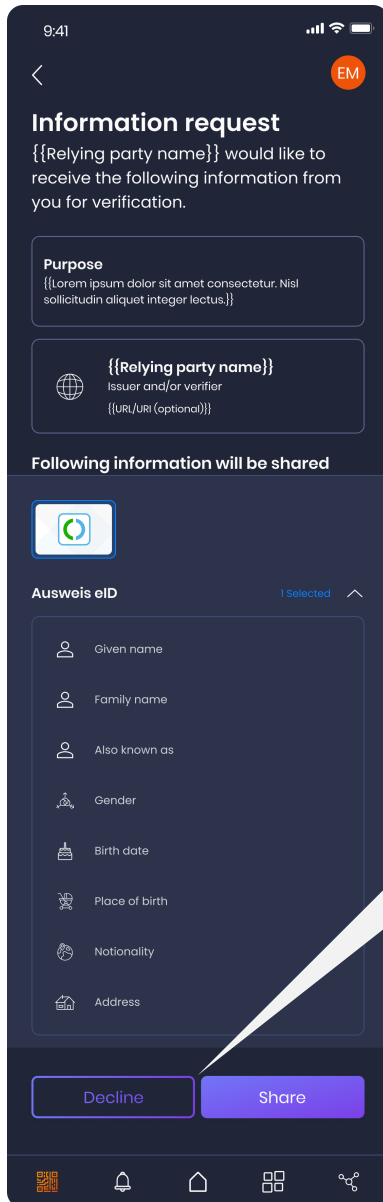

The organization must identify themselves.

Information request

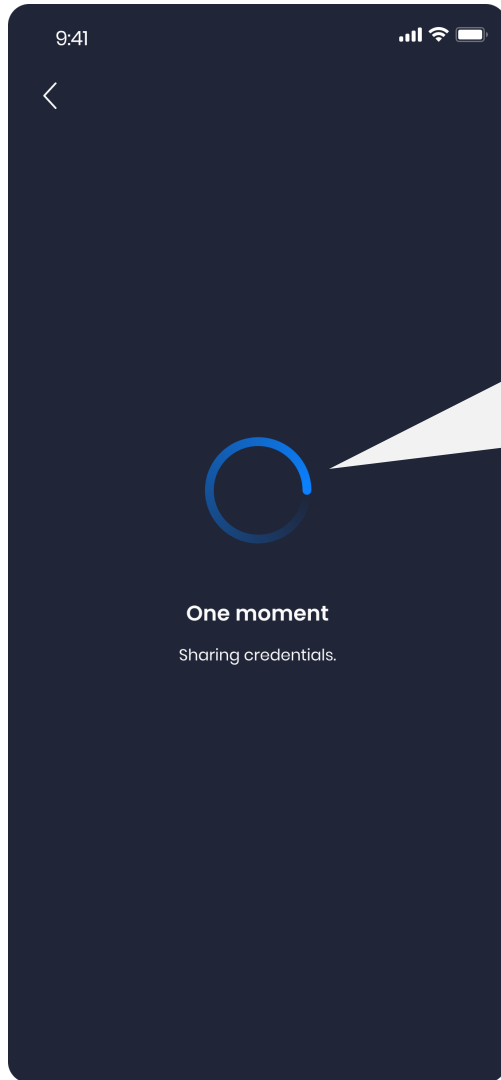

The organization must disclose exactly which information they are asking for.

Information request

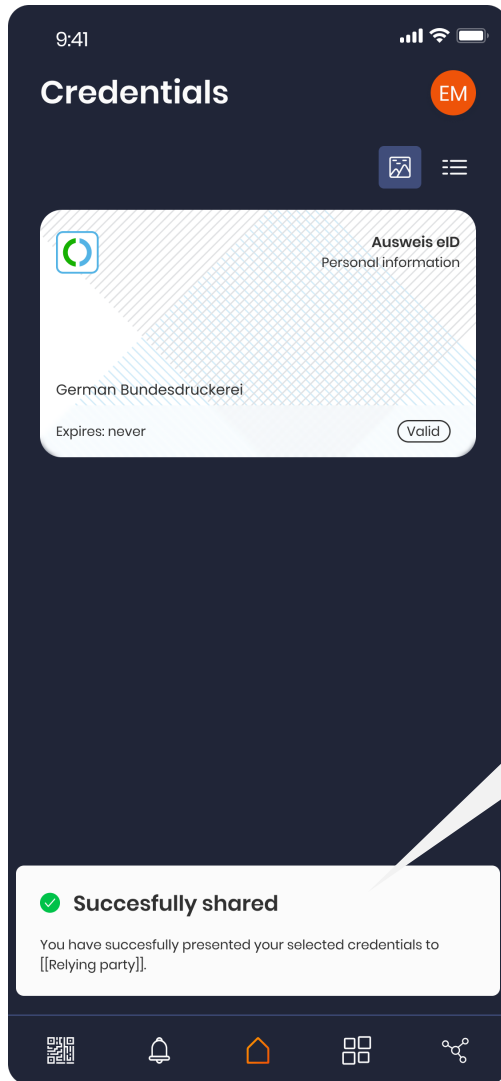

Only then you decide whether you want to share this information. Or not.

Information request

Only when you consent to share your information by pressing the [Share] button, your information is shared.

Information request

You receive a confirmation when the sharing was successful.

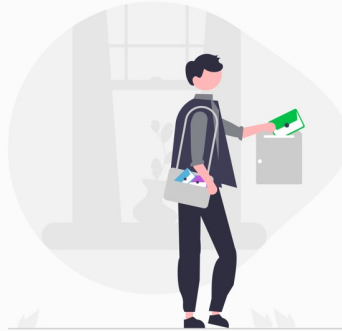

That action is also logged in your Wallet.

Relying party demo

Thank you for submitting the information

This has been successfully received.
