

Sphereon Wallet Onboarding

Getting Started

sphereon

The logo consists of the word "sphereon" in a lowercase, sans-serif font. The letter "s" is unique, featuring a red square block integrated into its left side.

Getting started

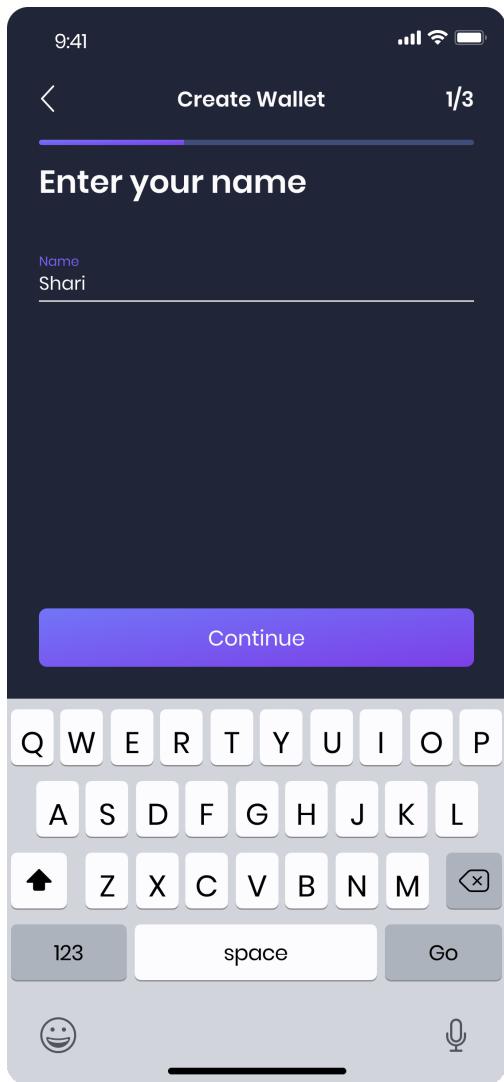

We'll guide you through the steps to create a wallet.

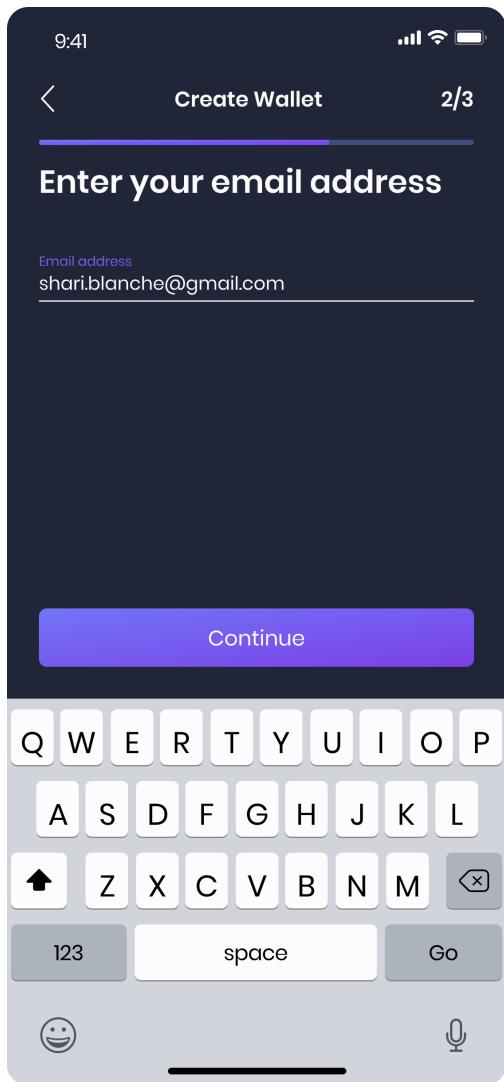

The 1st step is to create the wallet by providing some information about yourself.

Step 1: Creating the Wallet

Create Wallet

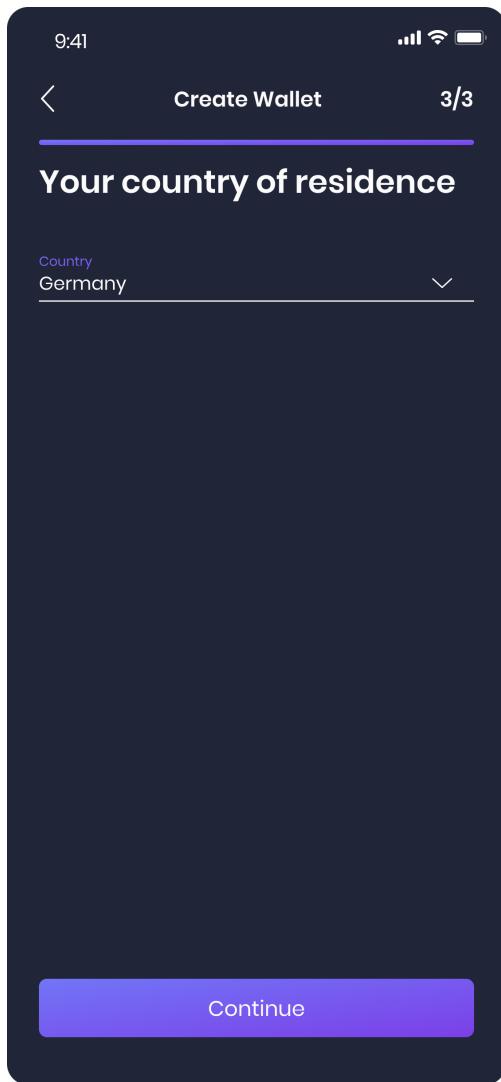

Create Wallet

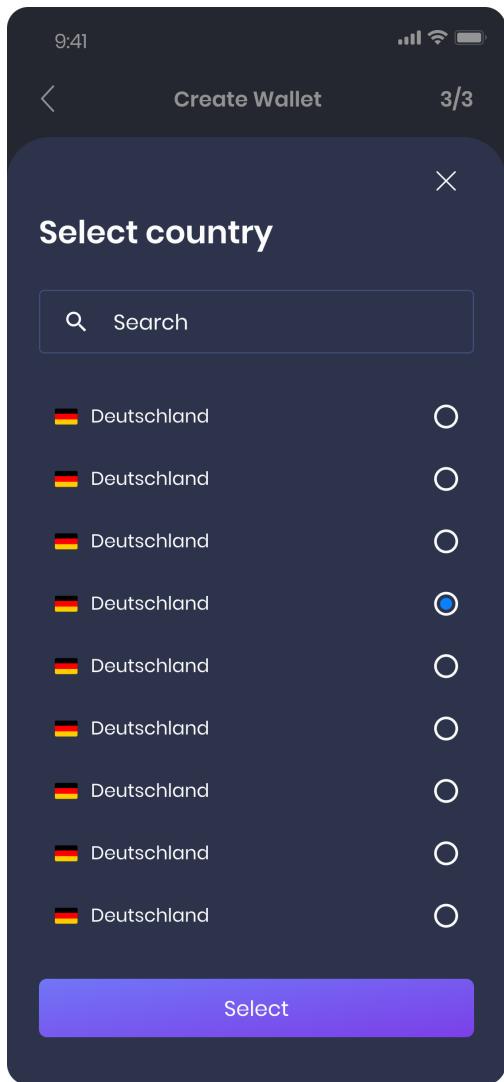

And your e-mail address.

Create Wallet

Next, tell us in which country you live.

Create Wallet

Next, tell us in which country you live.

Select your country from the list.

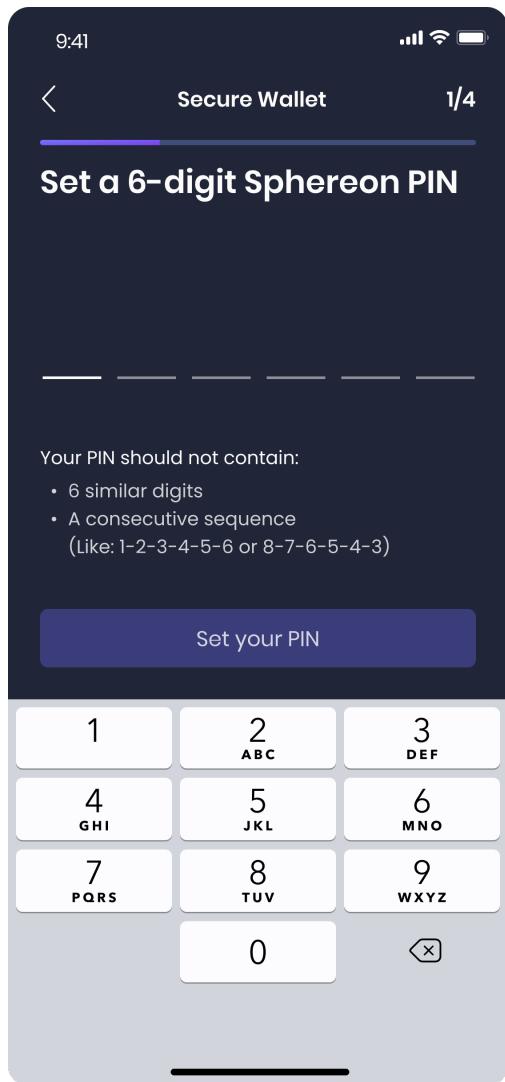

Step 2: Securing your Wallet

Secure your Wallet

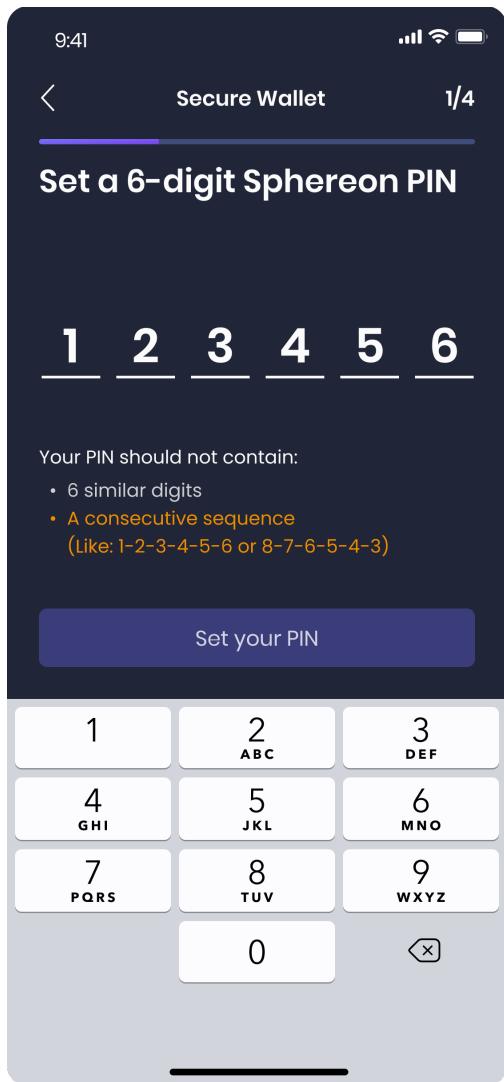

It is important to secure your Wallet so that only you have access to your information.

Secure your Wallet

Enter a number that you can easily remember.

Secure your Wallet

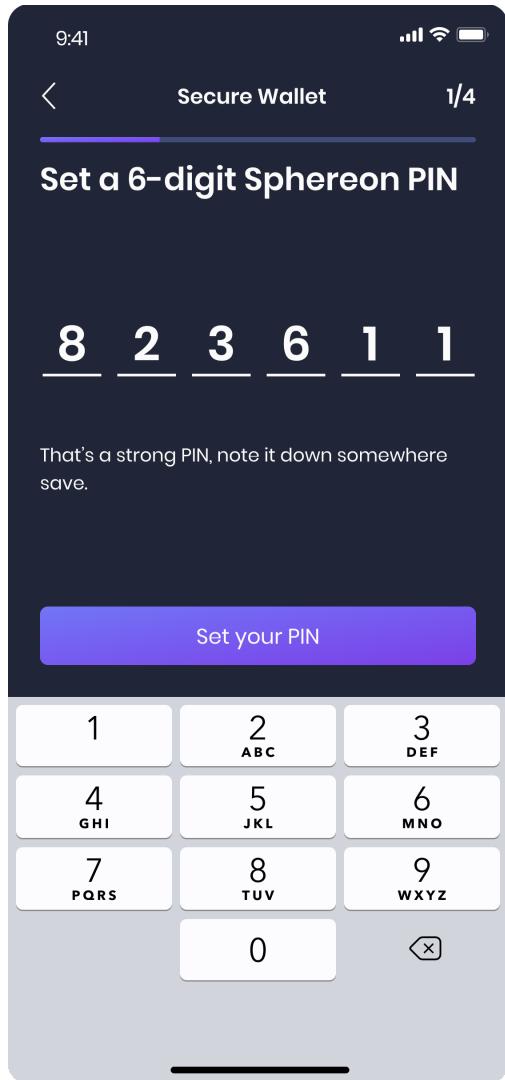

Enter a number that you can easily remember.

But not too easy, like 6x the same number.

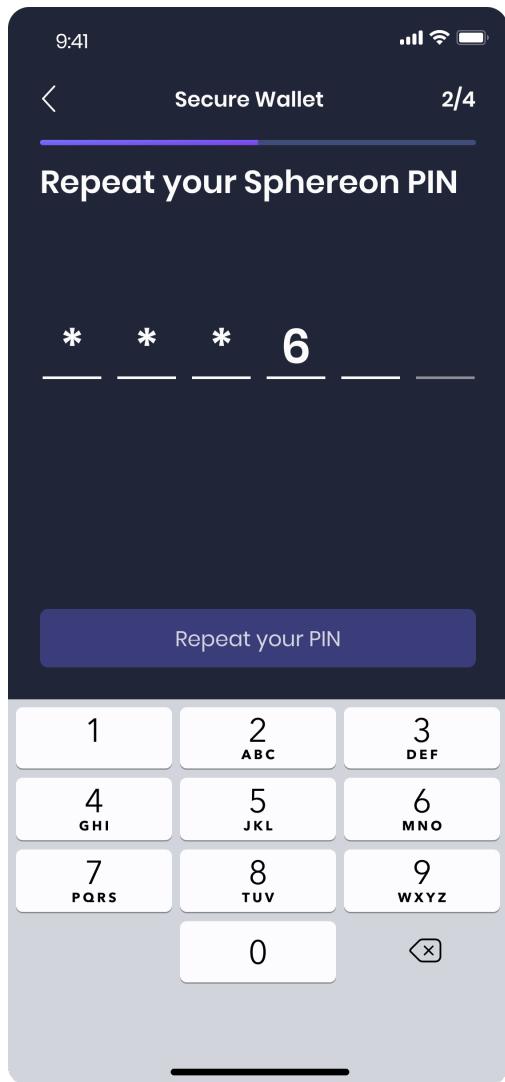

Or 6 numbers in a row.

Secure your Wallet

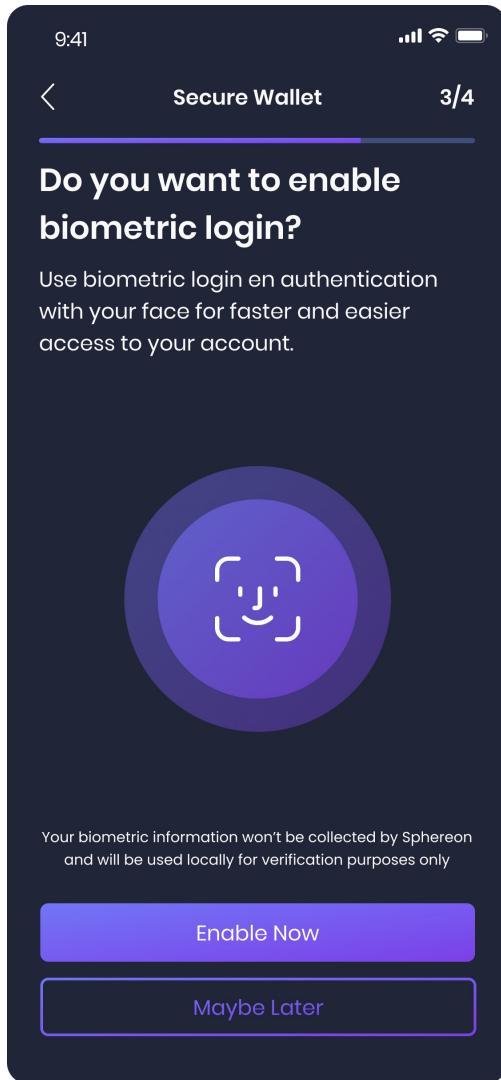

Save your PIN-number somewhere safe if you are afraid you might forget it.

Secure your Wallet

Repeat your PIN-number to check if you did not make a mistake.

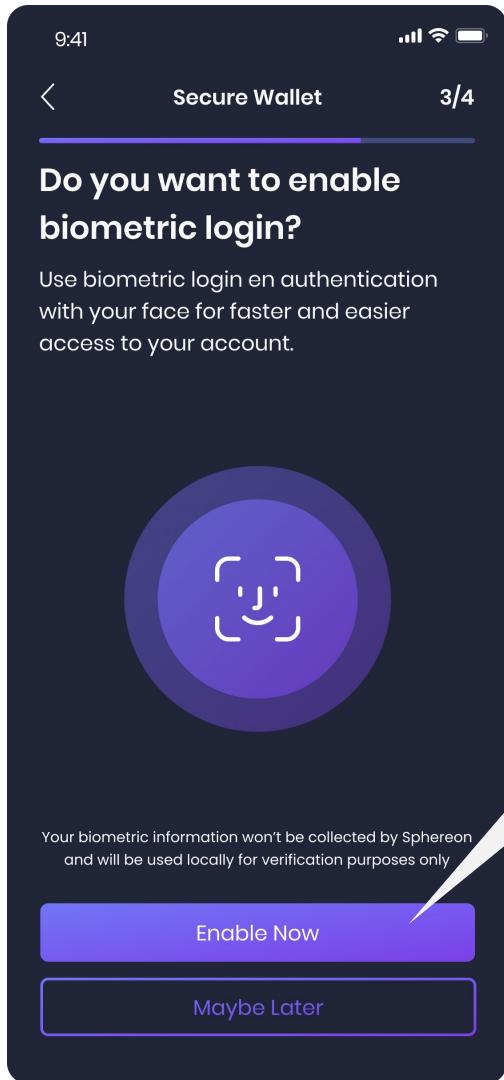

Secure your Wallet

You can enable the biometrics of your phone to get access.

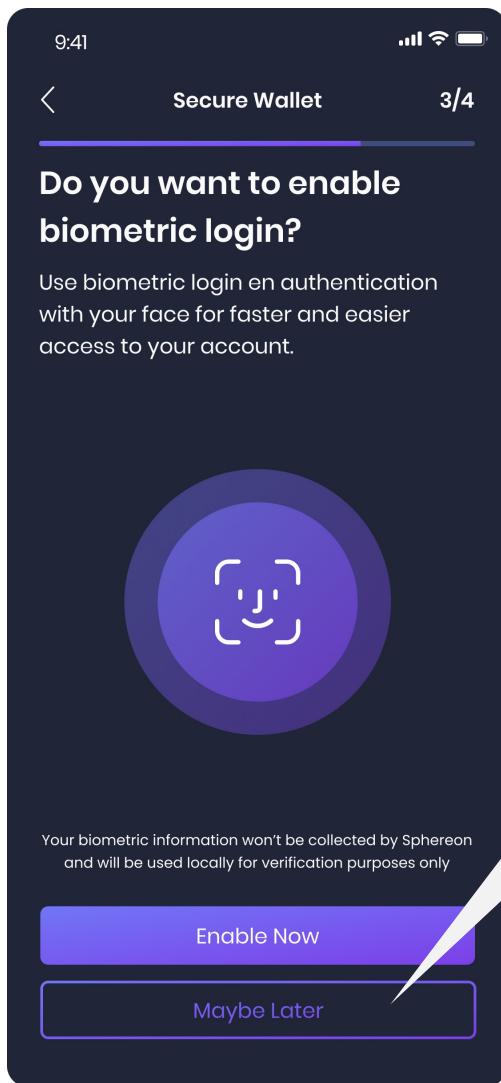

It is an option that will make you login *faster and easier*.

Secure your Wallet

You can enable this by pressing the [Enable Now] button.

Secure your Wallet

But you can skip this if by pressing the [Maybe Later] button.

Secure your Wallet

Accept Terms & Privacy

Press the [Accept Terms & Privacy] button to accept.

Step 3: Import Personal Information

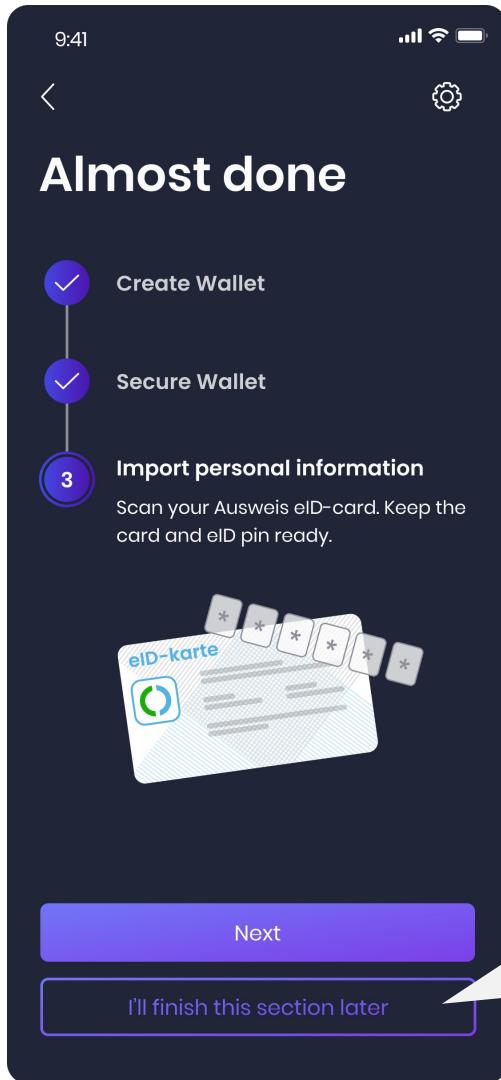

Import personal information

To identify you, we need to scan your eID-card.

Keep your eID-card and your eID-PIN ready.

Import personal information

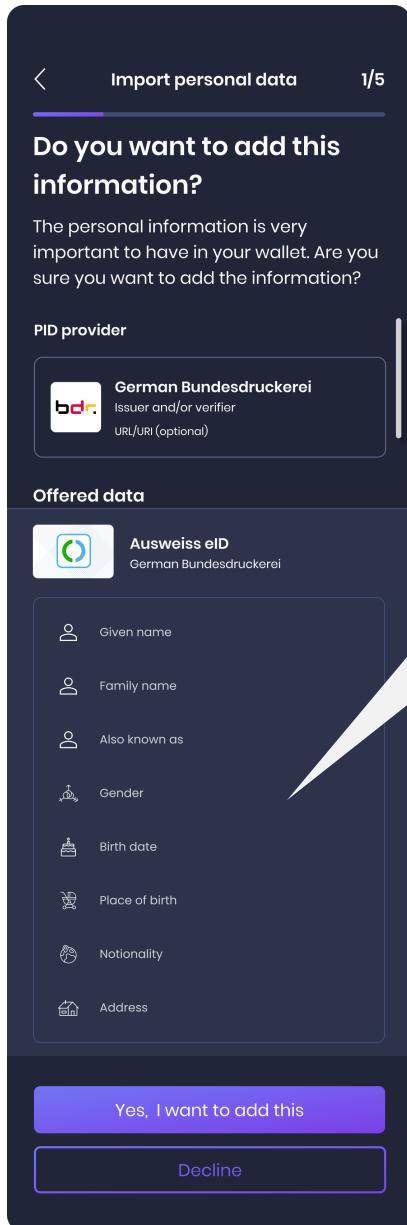

It's also possible to import the personal information later in time. For example, if you do not currently have the Ausweis eID card nearby.

By pressing the [I'll finish this section later] button.

When you do this the onboarding is almost complete.

Import personal information

When you have chosen to add the personal information immediately. We ask you to agree to store this personal information in your own personal wallet.

Because we do not want to do anything without your approval.

Remember, only you will have access: we do not store this anywhere else but on your phone.

Import personal information

< Import personal data 3/5

Have your Ausweis card ready for the next steps

Enter the eID pin and scan your card to import the data in your wallet.

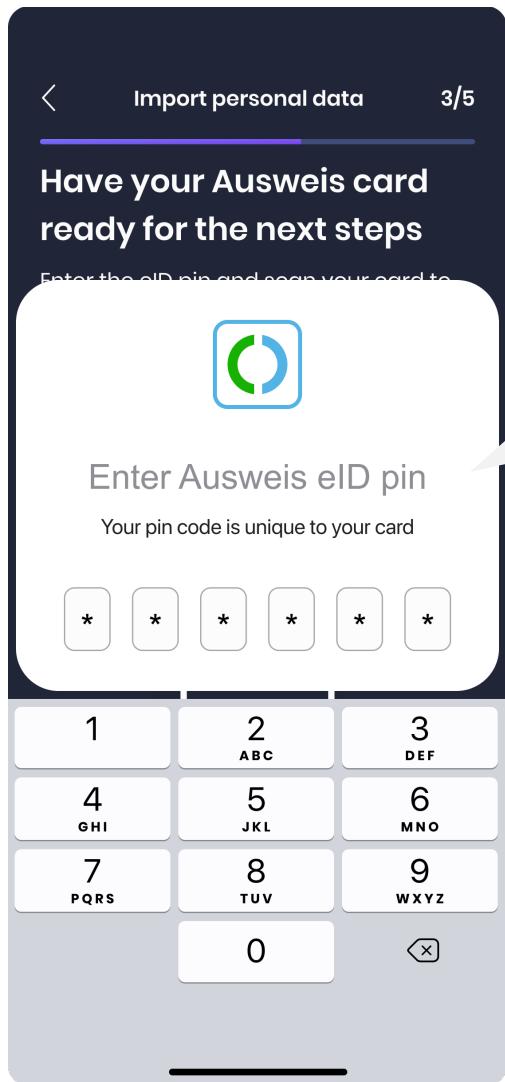

By holding your card to the back of the phone and press start reading your card.

Start reading your card

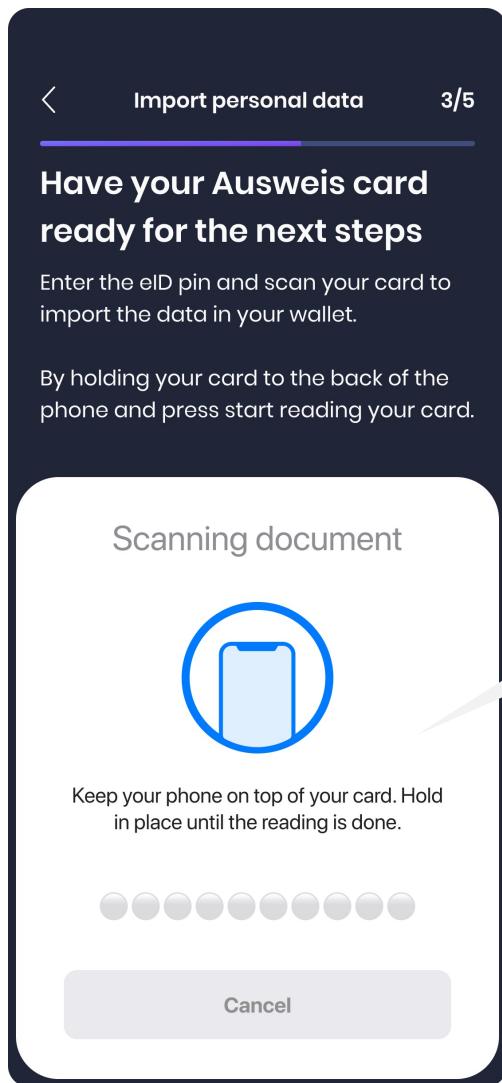

Hold eID-card to the back of your phone and press the [Start reading your card] button.

Import personal information

Enter the PIN of your eID-card.

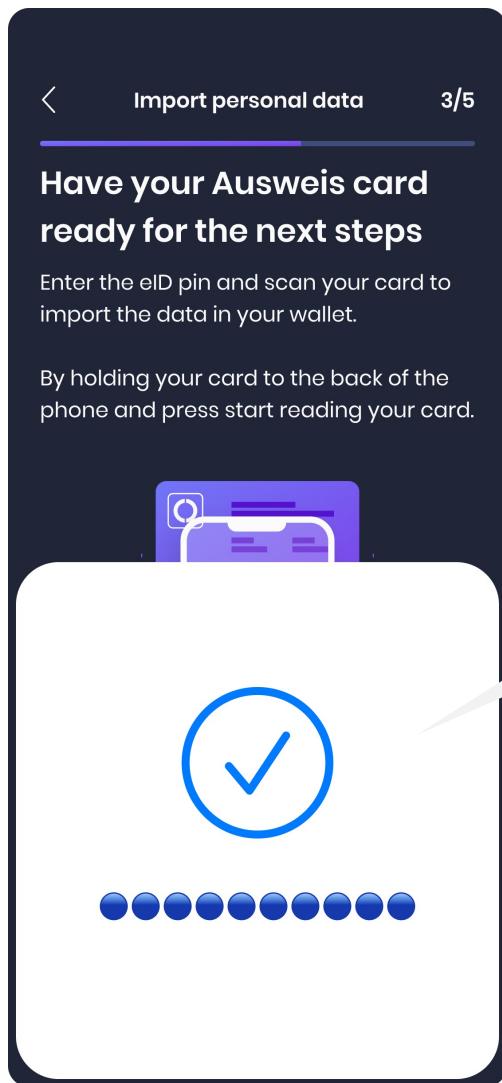

Import personal information

Your eID-card is being read.

This takes a bit of time. This is normal.

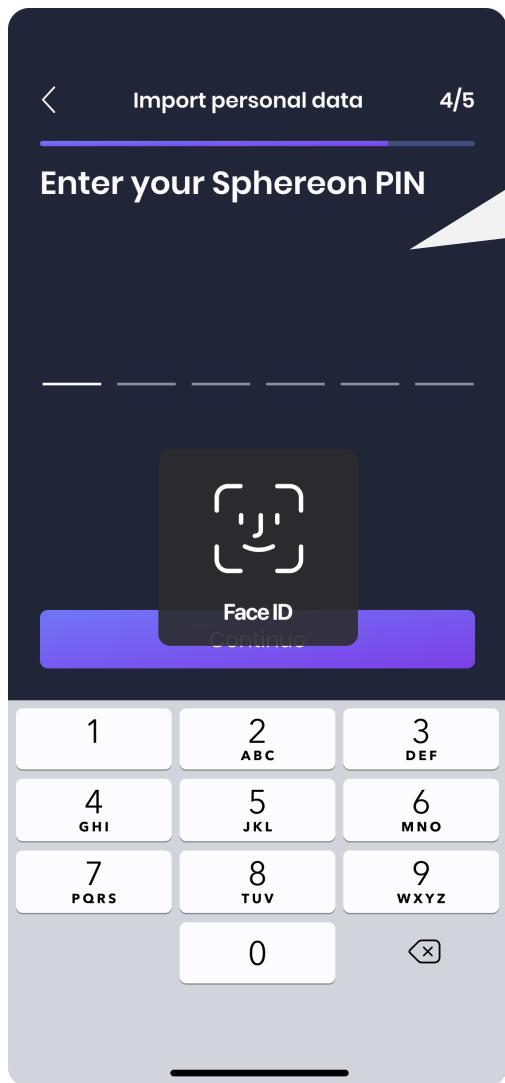

Import personal information

This means your eID-card has been read successful.

If not, relax, and just try it again.

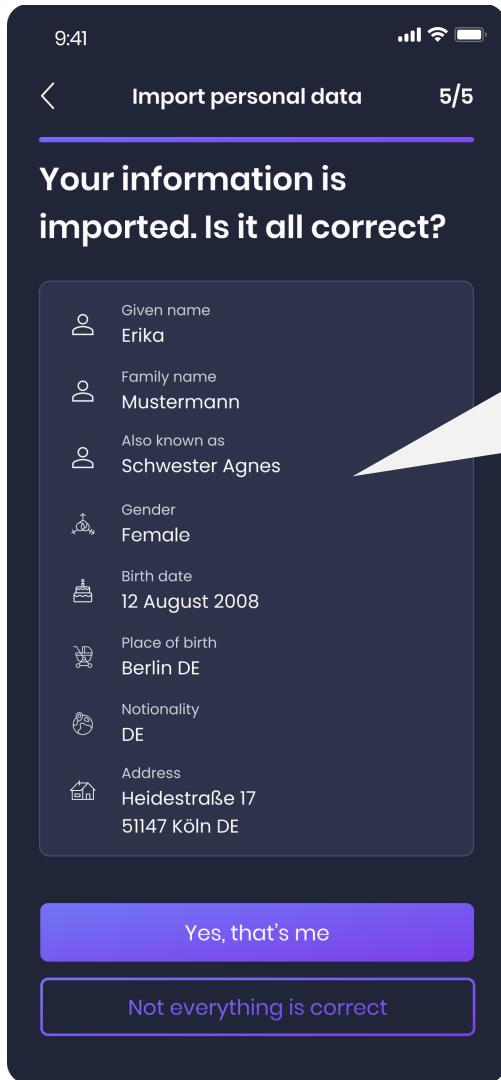

Import personal information

Enter your PIN-number you created earlier in the Wallet.

If you have enabled the biometrics, this will also give you access to your Wallet.

Import personal information

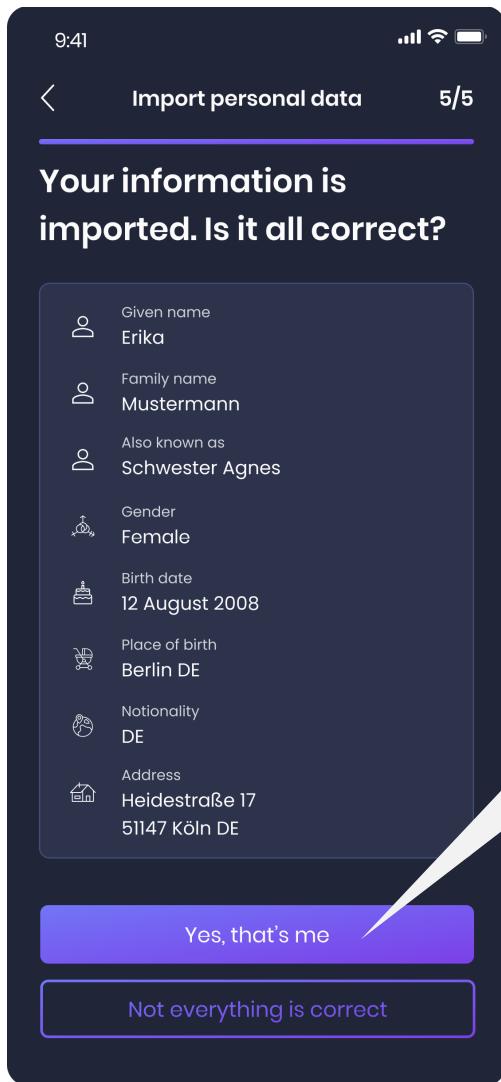

This is the information we got from your eID-card.

Please check carefully if everything is correct. This is important.

If not everything is correct, press the [Not everything is correct] button.

Import personal information

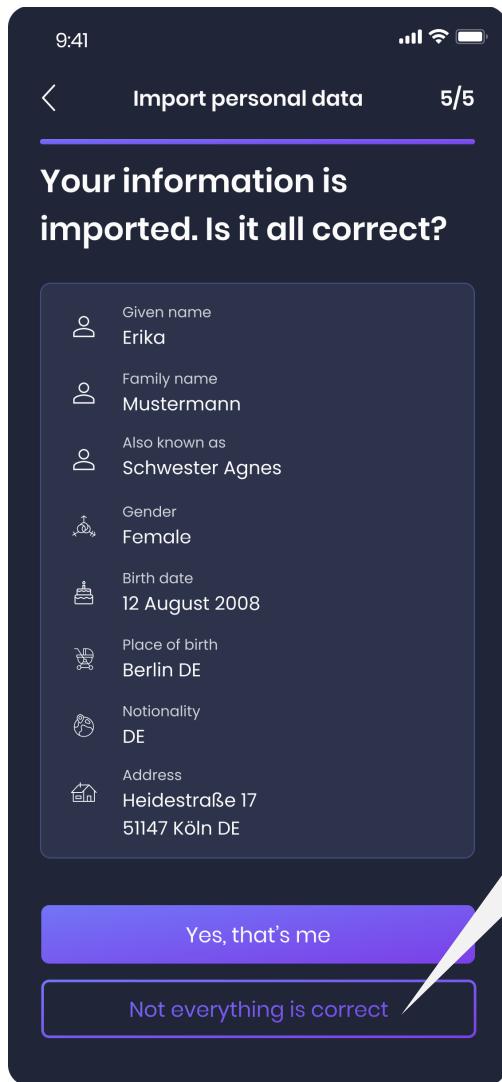

This is the information we got from your eID-card.

Please check carefully if everything is correct. This is important.

If everything is correct, press the [Yes, that's me] button.

Import personal information

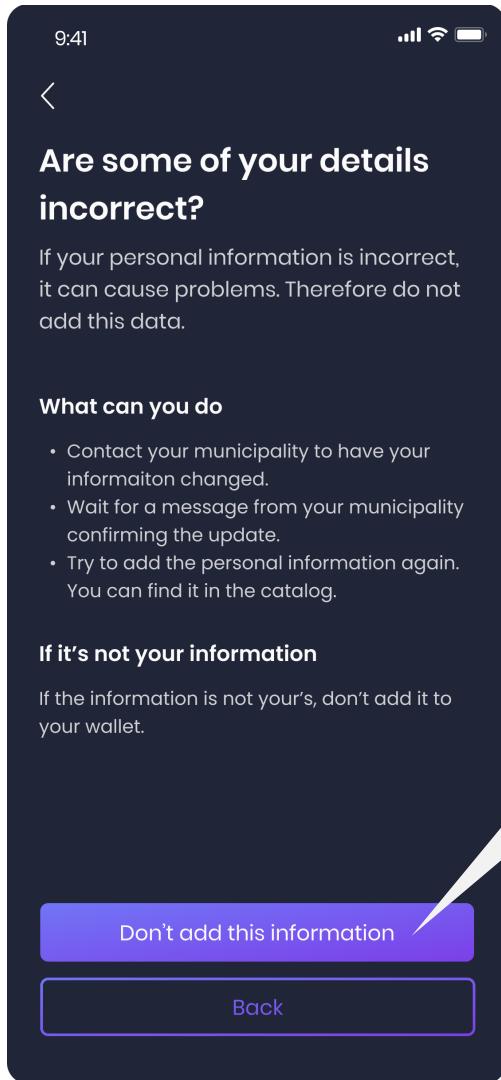

This is the information we got from your eID-card.

Please check carefully if everything is correct. This is important.

If not everything is correct, press the [Not everything is correct] button.

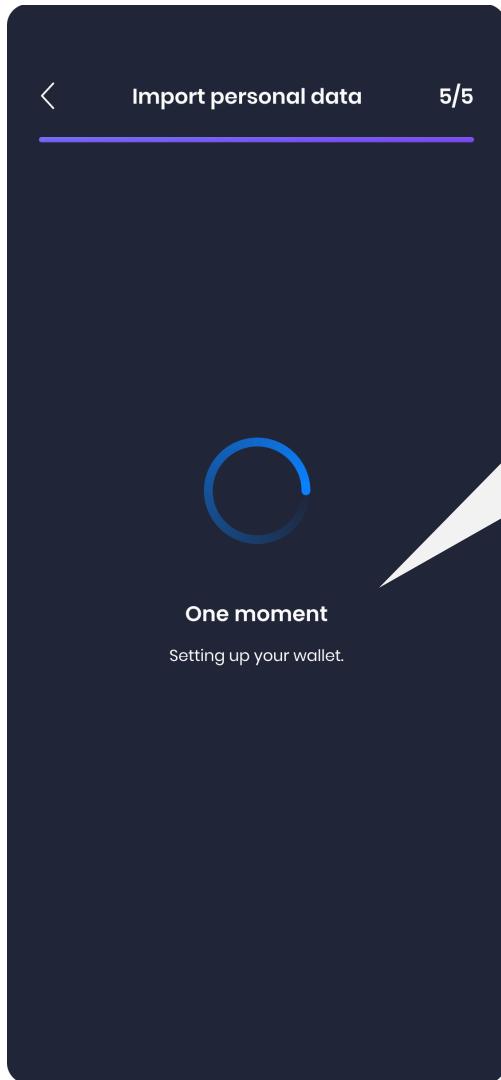

Import personal information

If not everything is correct, don't add this information! It can cause problems for you when it is used.

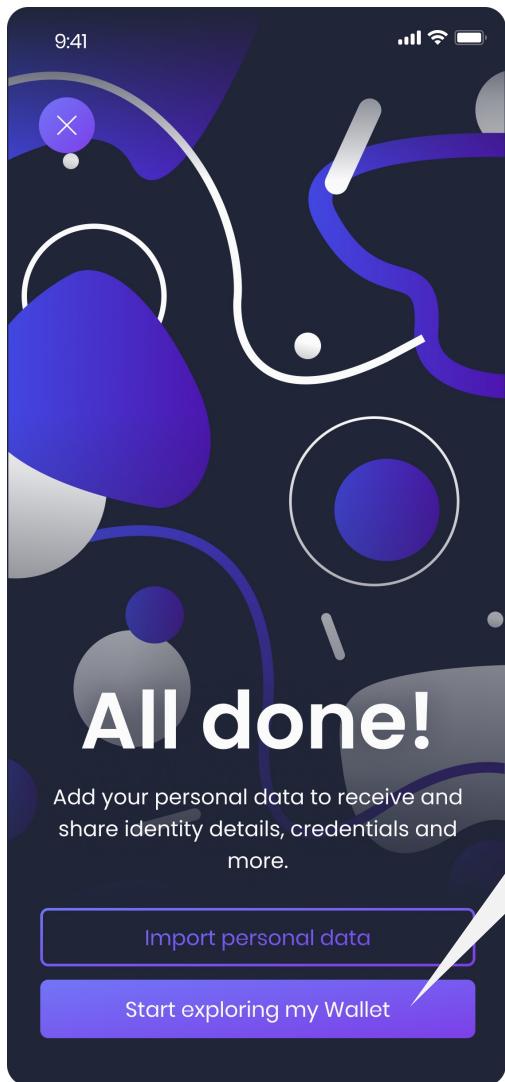

Contact your municipality to have the information changed.

Import personal information

If the information was correct and you have pressed the [Yes, that's me] button, the Wallet is being created and your personal information is imported.

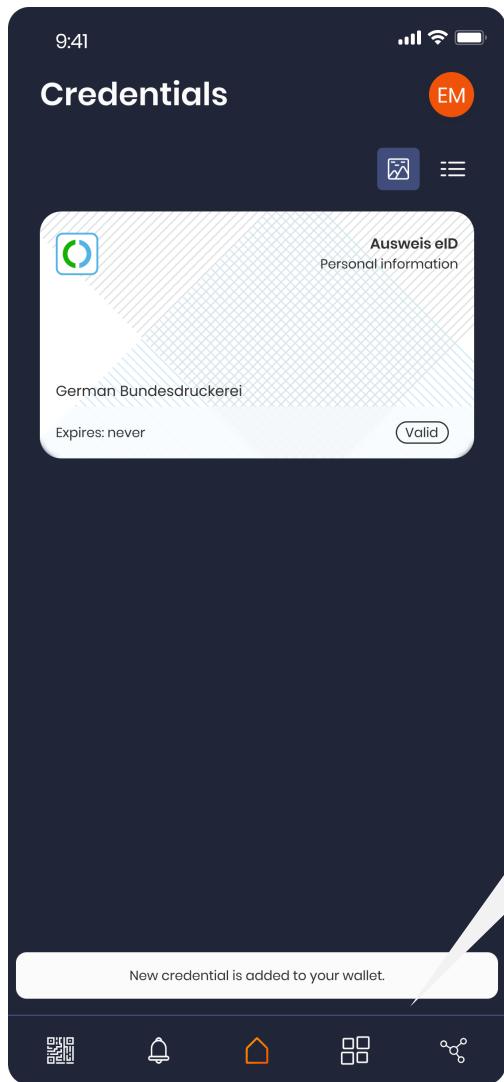

All done!

The Wallet is created. You can start using it.

Press [Start exploring my Wallet] to take a look.

Exploring the Wallet

The Wallet is created. You can start using it.

Your first credential is already there, the one you imported during the onboarding.
